

# DALI OBERON: REDISCOVER THE MAGIC OF MUSIC

**August 2018:** DALI redefines the audiophile-level loudspeaker market with the launch of the all-new OBERON series

Introducing OBERON – the latest loudspeaker series from Danish audio experts DALI (Danish Audiophile Loudspeaker Industries). Its mission? To bring its ethos of getting you ‘closer to the music you love’ to more ears than ever before.

Created to make genuine audio reproduction more affordable, the six-model-strong OBERON series was conceived to bring superior stereo and surround experiences to rooms of all sizes; and does so by incorporating key elements from DALI’s range-topping EPICON models.

## SIMPLY BETTER SOUND

Capable of dramatically reducing the distortion caused by conventional drivers, OBERON is the first entry-level loudspeaker to incorporate DALI’s unique SMC (Soft Magnetic Compound) technology. This, combined with DALI’s brand-new 29mm soft dome tweeter, large DALI signature wood-fibre cones and rigid-build MDF cabinets, makes for a series of speakers that deliver sound, from any source, exactly as it was intended to be heard.

## A SWEETER SPOT

Adding convenience to cutting-edge engineering, OBERON also offers a generous sweet spot and needn’t be toed-in (angled towards the listener), ensuring pure, well-integrated sound at all times anywhere within the room.

**The new OBERON series inherits DALI’s 35-years of exceptional audio experience and expertise at pocket-pleasing prices.**

## DALI OBERON 1

Ultra-compact, but packing a mighty audio punch, the OBERON 1 is the perfect solution for smaller rooms or discreet setups.

Sporting DALI’s brand-new 29mm soft dome tweeter and a 5¼-inch wood-fibre woofer, OBERON 1 fills the room with refined, expressive sound, whether positioned on a bookshelf or wall-mounted.

Packed with DALI’s proprietary technology – including the low-distortion SMC system – the OBERON 1 is small but perfectly formed.

## DALI OBERON 3

Combining ease of placement with audiophile performance, the OBERON 3’s 29mm soft dome tweeter seamlessly integrates with its 7-inch SMC-based woofer, producing breathtaking highs, detailed mids and tight bass.

Whether stand-mounted or placed on a bookshelf, the OBERON 3’s wide dispersion guarantees a larger sweet spot for perfectly balanced sound at any listening axis.

IN ADMIRATION OF MUSIC

### DALI OBERON 5

Designed for those who demand the purest performance from their loudspeakers, the elegant OBERON 5 houses two 5¼-inch wood fibre woofers, combined with the series' wide-bandwidth 29mm soft dome tweeter, to create a sound that's detailed, articulate and involving.

With deep bass, well-defined mid-range and strikingly clear, effortless highs, the OBERON 5 is equally at home with any music or movie soundtrack.

### DALI OBERON 7

The über OBERON of the series, the 7 is the choice of the ultimate audio aficionado. Built for epic performance without compromise, the OBERON 7 floorstander features two 7-inch, SMC-equipped woofers, providing the mid-range and bass power to support the ultra-lightweight soft dome tweeter. A spacious cabinet delivers the best in resoundingly deep bass for an expressive performance that can fill even the largest of rooms.

OBERON 7 delivers the delicately detailed, beautifully balanced sound that DALI is famous for.

### DALI OBERON ON-WALL

Discreet but deceptively powerful, the OBERON ON-WALL boasts the same soft dome tweeter and 5¼-inch woofer as its compact siblings, but also utilises DALI's down-firing bass port system to deliver low-end power without relying on bulky cabinet depth.

The unique combination of DALI's technologies creates a speaker that, despite its slim-line size, will deliver the precise, engaging audio of a much larger model, making it the ideal choice for wall-mounted stereo systems as well as multimedia surround setups.

### DALI OBERON VOKAL

The beating heart of the OBERON surround sound system, the VOKAL centre speaker has been designed to integrate seamlessly with every other speaker in the range.

With its 29mm ultra-lightweight soft dome tweeter and two 5¼-inch wood fibre SMC-based woofers, the OBERON VOKAL can sit either directly above or below the TV screen and upgrade any music or movie audio experience with its stunningly precise, clear and detailed performance.

**Available in 4 finishes fitting any home decor: Black, Dark Walnut, Light Oak and White.**

**Includes 2 new modern grilles variant in structured fabric:**

**Black grilles on: Dark Walnut and Black finishes**

**Grey grilles on: White and Light Oak finishes**
